COMMERCIAL AND FINANCIAL

Shorts Covering Shove Prices Up Despite Bears' Energy.

CORN AND DATS ADVANCE HALF CENT

II Provisions Close Five Cents Lower and December Wheat Just Holds Its Own on the Chicago

CHICAGO. Nov. 12—Bears oversold the grain market early today on bearish conditions and though the dull trade inclined toward lower prices covering brought an upward trend. December wheat closed unchanged, December corn the higher and December cats the higher. Provisions closed be lower.

cember oats 14c higher. Provisions closed to lower.

The wheat market was a dull, narrow affair, ruling most of the time slightly under yesterday. The opening was easier on improved weather conditions in the winter wheat belt, as the result of copious rains. Lower cables and continued liberal receipts also had depressing influences, and December, which opened \$654c to \$454c lower at 714g/13c, declined soon to 715g/2715c. Hears were disposed to sell, though not with any considerable pressure. There were good orders on the break, many from Wall street, and shorts had to cover, bringing December up to 724c. After this demand was supplied the market steadled and December closed at 726724c. Local receipts were at cars, mone of contract grade. Minneapolis and Duluth reported 915 cars, making a total for the three points of \$60 cars, against \$82 last week and \$25 a year ago. Primary receipts were 1,085,000 bushels, compared with \$65,000 bushels last year. Seaboard clearances were \$59,000 bushels. The seaboard reported 12 loads taken for export. Argentine shipments for the week were \$0,000 bushels, against \$5,000 bushels last year.

Trade in the corn pit was governed.

were \$0,000 business, solitate year.

Trade in the corn pit was governed.

Trade in the corn pit was governed. Trade in the corn pit was governed mainly by local conditions, following closely after wheat fluctuations. December opened to lower to unchanged, on weak cables and scalpers, following the wheat break, sold December down to 50% 100%. Fear of damage to stocks by the rains and the slight upturn in wheat brought shorts to the frealization of an oversold market and they ran to cover. December was in better demand than May, though all trade was rather dull. The nearer option narrowed the premium down to 2% and closed firm, to advanced at 60%. Receipts were 130 cars.

A strong cash situation in oats kept that pit fairly active, with a strong undertone. December was not favored much with business, but it echoed the strength in May. Trade was almost entirely independent of the other pits, with a fair commission house demand, but about as much realizing from the same source. Local professionals were prominent buyers. December, which opened the lower at 405cc, quickly reacted and closed strong, the up at 41c. Receipts were liberal at 207 cars.

Provisions ruled easy early on a large run of house and on liberal selling both by outside holders and packers. A better tone followed, however, and shorts covering brought an easy close. All January products closed 5c lower. January pork \$15.379, January lard \$5.775, and January ribs \$7.60.

Estimated receipts for tomorrow: Wheat, 65 cars; corn, 145 cars; cats, 220 cars; hogs, 22,000 head.

The leading futures record as fallows. strong cash situation in oats kept that

Dun Says United States Never Had Such Cause for Gratitude.

TRADE ONLY SIGHS FOR CARS TO CARRY IT

All Lines Booming and Release of Track Carriers by Close of Lake Transportation Comes . None Too Soon.

NEW YORK, Nov. 22.-R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say.

Never before in the history of the United States was there such great reason for a day of national thanksgiving. This country has made unprecedented strides toward a position of international supremacy, not only in commerce, but also in finance. To a marked degree business enterprises have proved successful. An idle wheel in mills or factories is the exception, while labor is so well employed at high wages that consumptive demands sustain market values of all staple commodities. Transporting facilities have been unable to keep pace with the nation's requirements, many complaining of tardy deliveries, which alone act as a brake on commercial progress. By closing lake navigation lower temperature will relieve the railway situation, thousands of cars being restored to inland traffic. This same factor of seasonable weather stimulates retail dealings and prompt collections swell bank clearings.

Careful search discloses few unfavorable factors in the iron and steel situation. Probably the least satisfactory conditions are found at plate mills, which report an uneven distribution of orders.

Will Expand the Buying. Weekly Review of Trade tomorrow will say

Will Expand the Buying.

A few large concerns appear to secure the bulk of new business, but heavy orders for cars will largely expand the buying. While the new combination will put the class of mills on a stronger basis. In rails there is no apparent limit to the orders placed, though some mills are unable to guarantee delivery within a year. One Plitisburg report places the years output of structural material at \$50,000 tons. After six months of more or less interruption all machine shops and kindred plants at San Francisco have fully resumed, and it is certain that the greatest force on record is now engaged in the various departments of iron and steel making. Raw material at the south has advanced, but at central points pig iron is steady, though rapidly absorbed.

absorbed.
Eastern footwear manufacturers are now generally insisting on small advances when new contracts are placed. Large jobbers resist the upward tendency, and the continued strength of leather will necessitate depreciation of quality if higher prices are not paid.

Neill'a Estimate Induces Caution.

Cotton relapsed finto dullness, with barely steady quotations, in marked contrast to the exceptional activity and strength of the same week in 1900, when prices were \$11.25 a bale higher. Foreign markets are held down by Mr. Neill's large estimate of the domestic crop, which is not likely to prove as near the fact as his excessively low prediction last year. Losses have undoubtedly been severe in many states, while prosperity in all other regions must bring a vigorous demand for goods, which is already perceptible in the activity of spinners. British exports of cotton goods are much larger than they were a year ago and domestic shipments to China have also increased of late.

Strength is the rule in the market for farm products. Favorable weather during the closing days of corn harvesting failed to bring any reaction from the highest price level in many years, and the market was equally oblivious to Atlantic exports for the week of only 450.434 bushels, as against 5.83.666 a year ago. After some weeks of gradual decline toward a normal position pork products suddenly bounded upward, regardless of weakness in live hogs. Wheat holds at about 3 cents above last year's prices despite the marked difference in size of crops. Receipts for the week were 5.00.517 bushels, against 2.664, 776 last year. Speculation in coffee has resumed normal proportions.

Failures for the week numbered 218 in the United States, against 136 last year, and 31 in Canada, against 29 last year. Netll's Estimate Induces Caution.

BRADSTREET'S REVIEW OF TRADE. Holiday Demand Better Than for Some Years Passed.

NEW YORK, Nov. 22.-Bradstreet's tomorrow will say:

NEW YORK, Nov. 22—Bradstreet's 10morrow will say:
Mild weather and the car shortage are
leading subjects for discussion in trade.
The former naturally limits read to the car shortage are
south, where, however, shorter than the price of cotton are additional features.
Taken as a whole, however, the recorder demand from jobbers the country over and the inquiry for holiday goods is equal to and in the latter case superior, to recently preceding years. While complaints of insufficient transportation facilities come from all American, Canadian and even some Mexican points, the chief tension is noted between the Alleghenies and the Ohio. While it is expected that the close of lake navigation will release some cars, little permanent improvement is looked for until after January I.

The iron and steel market has burst its bonds this week so far as prices are concerned and pig iron is 50c to \$1 at on higher at nearly all markets.

The strength of the coarser grains, particularly corn and oats, is the steadying feature in cereals at present. Wheat weak, end recently on the record-breaking increase in the visible supply records reported in Eradstreet's. A good export demand is reported at the decline and late firmness is in sympathy with the strength in corn. The southwestern drouth is reported as further complicating the car shortage in the grain trade.

Wheat, including flour, exports for the special propers of the car shortage in the grain trade.

Wheat, including flour, exports for the special propers of the car shortage in the grain trade.

Wheat, including flour, exports for the special propers of the car shortage in the grain trade.

Wheat, including flour, exports for the special propers of the car shortage in the grain trade.

Wheat, including flour, exports for the special propers of the car shortage are reconcerned as further compleating the car shortage are propers.

Bearish manipulation of the print cloth market in the shape of a cut of prices of leading indigo and shortings and more propers.

Eastern shoe Failures in the United States for the week were 223, against 218 last week, 215 in this week a year ago, 202 in 139 and 182 in 1898. Canadian, failures number 22, as against 30 last week and 31 in this week a

Friday Market Gets the Benefit of

Thursday's Brisk Speculation

NEW YORK, Nov. 22.—The strength in today's broad and animated market was the sequence of the sudden awakening of speculative activity yesterday afternoon. A large bear account was caught uncovered as a consequence of the persistent short selling by the professional element for some time past on the assumption that the money market could not escape a squeeze between now and the first of the year and that the growth of opposition in the northwest to the Northern Securities company would disseminate depression throughout the market. The unexpected collapse in the foreign exchange market and the prospect of recuperation for the money market left the bears without much ground to stand on, and they bought eagerly to cover the day. There was a considerable influence in the recovery of prices. But the clearing up of the money situation leaves the way open for the natural operation of verious forces making toward higher prices. The character of today's market made it appear that a considerable speculative element has been waiting and eagerly on the watch for just this development. The demand for some of the favorite stocks was on a very heavy scale and the day's transactions were run up once more to over a million shares. The considerable advance during the day invited profit-taking in the final dealings and last prices on the principal active stocks were between 1 and 2 points lower than the best. The late selling was accentuated by a renewal of the acute weakness in People's Gas on the denial of a restraining order against the assessment of taxes on the alleged high valuations of Hilling's corporations. The stock tumbled 2% from the best and Consolidated Gas slumped 4½.

The aggressive strength of New York Central and Marchatter continued a videly. Thursday's Brisk Speculation.

of £1,500,000 at 34. The feature of the market was a recovery in the American department, the bear contingent's strength in New York. There was little fresh buying, London still being a seller on balances, but New York persistently absorbed the coal stocks. The features were New York Central and Norfolk & Western, the latter touching the record price of \$60. The market closed cheerful and at the top. Money rates ruled steady. Gold to the smount of £82,000 has gone out to Uruguay. The price of the metal has dwindled to 72,914d. Today's arrival of £160,000 from the Cape is expected to go to the Bank of England. The following are the cosing prices on the New York Stock exchange:
